Schedule your labs, imaging, and referrals

To schedule your appointment(s), please call **866.320.4573**. You can
also book an appointment for most lab tests through MyChart.

If you have a full day of appointments and need same-day labs (or
would like to complete testing immediately after your appointment
today), you can walk in without an appointment. Please expect longer
than normal wait times for walk-ins.

Note: Pre-surgical bloodwork for procedures scheduled at a Cleveland-
area facility cannot be completed at Akron General, and vice versa. Lab
tests requiring insurance authorization must be scheduled by phone.

Today's Visit

You saw Michael Saribalas, DO
on Wednesday February 11,
2026 for: Established Patient.
The following issues were

addressed:

- Willis-Ekbom syndrome

OSA (obstructive sleep apnea)

Schizoaffective disorder (HCC)

Syncope

Undifferentiated schizophrenia (HCC)

Aspirin long-term use

Onychodystrophy

Orthostatic hypotension

Essential hypertension

Additional Information

Body Mass Index or BMI is calculated from your height and weight. If you are ages 18-64, a typical BMI goal is approximately 18.5 to 25. Your provider may have a different BMI goal for you. A BMI that is too high increases your risk of heart attacks, strokes, diabetes, certain types of cancer, high blood pressure, and many other medical problems. Eating a healthy diet with lots of vegetables every day and regular exercise aids in achieving a normal weight. If your BMI is outside the normal range, please talk to your provider about how you can try to improve.

Thank you for coming to see me today. I appreciate your confidence in choosing Cleveland Clinic for your medical care. If you have any questions about your visit today, please call our office and my staff will forward your message to me. I will get back to you as soon as possible.
